Tube test from one side only!

Nordtec Tube Tester

A new developed tool for testing tubes in heat exchangers for leaks, followed by the option of plugging of tubes immediately, from one side of the cooler only!

Use this product for:

- Testing tube state in heat exchangers
- Plugging Device for instant repair of leaking tubes.

Fast location of leaking tubes, just insert **Nordtec Tube Tester** into the suspected tube/s.

Bend the handle on front of the **Nordtec Tube Tester** in order to lock it.

Pull the trigger in front of the handle and read the pressure information on the meter.

If the meter indicator pressure drop the tube is leaking. Fitted with 6 bar safety valve.

Nordtec Plugging Device

Eliminates leaking tubes, thightend from one end only. Nordtec Plugging Device can be made to fit nearly any tube.

Variable length and diameter available upon request.
